**Pre Milking & Udder Hygiene**

**VIROLAC CONCENTRATE PRE & POST TEAT SPRAY**

- Powerful antibacterial disinfectant LSA*
- Excellent teat condition 4-1 mix
- Pre and post milking optimal protection proved with Virolac Concentrate

Contains an active complex and a very powerful disinfectant: LSA. Available in 10kg, 22kg & 60kg

*Lactic Salicylic Acid complex is effective within 30 seconds on all mastitis-causing bacteria as well as viruses and yeasts. PCS No. 96269

**VIROLAC SPRAY READY TO USE**

- Powerful antibacterial disinfectant LSA
- Excellent teat condition ready to use
- Pre and post milking optimal protection proved with Virolac Ready to Use

Contains an active complex and a very powerful disinfectant: LSA. Available in 220kg & IBC PCS No. 97609

**VIROLAC FILM RTU POST MILKING TEAT DIP**

- Protects the teat canal up to one hour after milking
- Contains Aloe Vera
- Insect repellent

Optimum protection proven: Virolac Film contains the new LSA technology. Available: 22kg. PCS No. 96270

**HYPRED QUICK SPRAY - RTU PRE & POSTS TEAT SPRAY**

- Enriched in hydrating and emollient substances bringing exceptional lubricating levels
- LSA is based on a hydroxyl acids complex
- LSA is effective in 30 seconds on mastitis
- Pre and Post milking

Available in 22kg, 60kg, 220kg & IBC. PCS No. 96262
Advantages of Hypra’zur

Cleaning and laundering of cleaning cloths
Bactericidal properties
Environmentally friendly

Clean & White

Hypra’zur insures a deep cleaning of cleaning cloths (washing machine safe for parlour garments) Hypra’zur contains a white enhancer for a better for a better visual result

Disinfection

Hypra’zur is composed of active oxygen which confers bactericidal properties. Available: 22kg PCS No. 96259

Application:
After milking: Ring out cleaning cloths
• Pour powder Hypra’zur on the cleaning cloths
• Add hot water to cover the cleaning cloths

At next milking
• Take cleaning cloths and put them in a hot water bucket.
• You can use Hypra’zur in the washing machine.

HYPRA SPRAY

HYPRA-SPRAY is a ready to use product based on enhanced Lactic Acid & Chlorhexidine Gluconate. It is suitable for use as foam, dip or spray for teat disinfection.

HYPRA-SPRAY is suitable for use pre and post milking. The high levels of emollient contribute excellent skin conditioning properties.

Available in 220kg & IBC. PCS No. 97514

LSA WIPES

Advantages of LSA wipes
• Pre milking preparation of teats
• Bactericidal
• LSA disinfection based (LSA is effective in 30 seconds on mastitis causing germs, RTU)

Available: 22kg
PCS No. 96267

HYPRA’ZUR – DAIRY CLOTH DISINFECTION

Advantages of Hypra’zur

Cleaning and laundering of cleaning cloths
Bactericidal properties
Environmentally friendly

Clean & White

Hypra’zur insures a deep cleaning of cleaning cloths (washing machine safe for parlour garments) Hypra’zur contains a white enhancer for a better for a better visual result

Disinfection

Hypra’zur is composed of active oxygen which confers bactericidal properties. Available: 22kg PCS No. 96259

Application:
After milking: Ring out cleaning cloths
• Pour powder Hypra’zur on the cleaning cloths
• Add hot water to cover the cleaning cloths

At next milking
• Take cleaning cloths and put them in a hot water bucket.
• You can use Hypra’zur in the washing machine.
**DERMISAN – HAND & TEAT DISINFECTION**

**Advantages of Dermisan + cleans:**
- Teats
- Dishcloths
- Hands

**Teat protection**
Dermisan + is suitable for all kinds of herds and all types of farms, especially with soiled/dirty cows

**Prevention of infections**
Dermisan + has a disinfectant that disinfects hand cloths between milking. Available: 10kg, 22kg.

**Application:**
- Put the used cloths in a second bucket.
- Thoroughly clean cloths to remove all organic matter.
- Soak cloths between milking in a solution with 0.5% Dermisan.

---

**PERFO GRIF – CLUSTER DIP**

**Advantages of Perfo Grif**
- No residues
- Reduces the risk of contamination, bactericidal, sporicidal

**Cluster Dipping**
During milking an infected cow can potentially contaminate the following 6 cows through the clusters.

Stops cross contamination between cows via clusters, thereby reducing S.C.C. & mastitis.

**Final Rinse**
It is important to ensure Perfo Grif reaches all parts of the plant by using adequate water volume. Available: 24kg
PCS No. 96265

**Cluster Dipping:**
Use 30 ml per 20 litres of water

**Final Rinse:**
Use 60ml Perfo Grif per 100 litres water (rate dependent on whether hard or soft water)

---

**Detergents & Acid Descalers**

**HYPRACID ONE - HYPRACID ONE MAKE YOUR DAIRY A CHLORINE FREE ZONE**

- Eliminates chlorine residues completely from your wash routine
- Unique 3 in 1 action; Detergent, Descaler & Sterilizer
- Nitric acid free – softer on rubberware
- Phosphoric acid free – environmentally friendly
- Gives excellent TBC and thermoduric results

Available: 22kg, 60kg, 220kg
PCS Number: 98182
### UNISCALE

This is a high performance descaler for milking equipment which contains both phosphoric and nitric acid. It also contains a surfactant to prevent rubberware degradation. It can be used in both hot or cold wash systems. Available: 25ltr & 120 ltr.

**Application:**
After milking rinse equipment with warm, drinkable water. Circulate the solution made of min 1 ltr Uniscale on 50 ltr water at 50-70°C for 5 mins (Hot). Rinse with cold drinkable water.

### UNISAN LIQUID

- Detergent
- Bactericidal disinfectant
- Degreasing agent
- Non foaming

Available: 20ltr, 60 ltr, 205 ltr
PCS No. 96944

**Application:**
400ml/45 litres of water – Cold
300 ml/45 litres water – Hot
Tank: Automatic wash: 300ml/10 gal water
Brush wash: 300ml/10 gal warm water
Use every day in conjunction with Unipred (once a week)

### UNISAN PLUS

- Powder detergent for: Circulation cleaning of milking machines
- Energy saving between hot & cold wash
- Prilled – less dust
- Not chlorinated – less corrosion

Available: 20kg

**Application:**
Hot wash over 75°C/ 3 to 4 oz in 10 gal
Warm wash 45 – 70°C/ 4 to 6 oz in 10 gal

### HYPRAL ONE - NON CHLORINE WASH

28% Caustic non chlorine detergent wash.

**Advantages:**
Non chlorine detergent wash for QAC compliance.

Available: 25kg, 230kg

**Application:**
Use 300mls/ 45 litres in both morning and evening hot washes. Alternatively use 300mls in morning and use Uniscale in the evening hot wash.
HYDRAFEED

Calf electrolyte treatment
- Unique lactose-based electrolyte
- No rest period after treatment, immediate return to milk
- Double energy (glucose and galactose)
- Electrolyte co-transporter agent
- Ready to use effervescent powder, rapid action on acidosis
- Vanilla flavour
- Palatability guaranteed
- Available: 16 sachet per box

Application:
One sachet for 2 litres of food safe water

PODOCUR SV HOOF CARE

Advantages of Podocur SV
- Strengthens the hoof
- Enhances hoof hygiene
- Is effective even at low temperature

Available: 24kg
PCS No. 96266

Application:
2% normal rate in foot bath once monthly
5% higher rate in foot bath occasionally
For severe cases: mix 50:50 (water & Podocur) and spray on hoof for 3-4 days consecutively with hand sprayer

PODOGEL

- Specially formulated hoofcare gel
- Both strengthens and enhances hoof hygiene
- Ideal for spot or routine treatment
- Available in 5kgs
PCS No. 96743

Application:
Wash and dry affected area, apply twice daily with brush for 3 days.

Hoof pairing
Apply generously to the paired hoof including the interdigital space.

NEW!

ACTISAN

Actisan is a biocide anti-bacterial bedding treatment for animal housing.

Effective against:
Streptococcus uberis | Streptococcus dysgalactise E.Coli
1kg Actisan absorbs 2kg of water and 1kg of ammonia.
Disinfection: Contains salicylic acid and aluminium sulphate.
Available: 25kg. PCS No. 95911.

Application:
150g per cubicles on first application
100g per cubicle every 48 hrs after the first application.

NEW!

FAM 30

- Department of Agriculture approved general disinfectant
- Quickly kills bacteria, viruses and fungi
- Active in the presence of organic matter
- Cleans and disinfects in one operation

PCS No. 93935

Application:
For general use at 1:90 and for TB at 1:20
PREPARATION FOR CALVING: BOLIFAST® PHYSIO

- Complementary feed for dairy cows,
- Rich in rumino-protected Choline and Methionine,
- Targets: HP Dairy cows, Fat cows,
- 12 boluses per box

**Key benefit:**
- Nutritional support of liver functions

**Special features:**
- Rumino-protection,
- Effervescent bolus,
- Intestinal absorption.

**Application:**
- 1-2 weeks before calving

CALVING: BOLIFLASH® CALCIUM

- Mineral dietetic feed for dairy cow,
- Reduction of the risk of milk fever,
- Targets: HP dairy cows, 3rd calving, recurring risk cows
- 12 boluses per box

**Key benefit:**
- High calcium supply highly assimilable,

**Special features:**
- 3 sources of calcium supply,
- Formation of calcium citrate by effervescence,
- Effervescent Bolus.

**Application:**
- At calving

CALVING: BOLIFAST® RUMEN

- Complementary feed for dairy cow,
- Rich in Yeast, rumino-protected Betaine, Choline and Niacine,
- Targets: HP Dairy Cows,
- 12 boluses per box

**Key benefit:**
- Stimulation of the ruminal fermentations and digestion,
- Nutritional support of liver functions,

**Special features:**
- Rumino-protection, Inactivated yeast,
- Effervescent Bolus,
- Intestinal absorption.

**Application:**
- At calving

REPRODUCTION: BOLIFLASH® FERTIL

- Complementary feed for dairy cow
- Rich in Selenium, Copper, Zinc, Manganese, Iodine, A and E vitamins,
- Targets: Poor fertility
- 12 boluses per box

**Key benefits:**
- Nutritional flushing for the preparation of reproduction,
- Stimulation of heat expression

**Special features:**
- Chelation – Effervescent bolus

**Application:**
- 1-2 weeks before insemination
